

135'Light-Touch Car Wash System
WITH SPYDER, MITTER, MicroClean, OMNI, HALO, AND TIRE SHINER

Wash, Wax, Seal, Tire Shine & Dry **Up To 160** Cars Per Hour!

SONNY'S 135-MT

Conveyor

 1) 12' wide correlator allows both customers and employees to safely and easily drive onto the conveyor.

- 2) Roller-on-Demand conveyor with 3 ft 6 in chain spacing delivers maximum throughput.
- 3) Exclusive midprofile roller eliminates the potential for vehicles to jump off a roller.

Pre-Wash

4) Two dual directional foaming pre-soak arches, and floor mounted dual directional foaming bumper applicator loosen and pull dirt from the vehicle's surface before entering the wash cycle.

5) Foaming Chemical Tire Applicator (CTA) and mag wheel applicator apply detergents to wheels and tires for cleaning.

Wash

6) Two Front-To-Back Mitters, both with MicroClean cloth, along with a Side-To-Side Mitter and OMNI 350 High Pressure arch clean all horizontal surfaces.

7) Double Jog SPYDER, two sets of side washers, and OMNI 350 clean all front, back, and side surfaces.

Rinse

8) Exclusive HALO Rinse Arch with booster pump points all nozzles to the center of the vehicle to completely rinse detergent.

9) Three gravity fed rain manifolds mounted to a 10 ft. arch apply drying agent, sealer wax, and final fresh water or optional spot-free rinse.

Services

10) Exclusive to SONNY'S, designed in conjunction with SI-MONIZ, the Tire Shiner completely automates tire dressing.

- 11) Triple color foaming arch applies triple foam wax.
- 12) SPINNER, OMNI, CTA, and Tire brush completely clean wheels and tires with no prepping.

Drying

13) A 165 HP drying system completely dries the vehicle, 11 completely adjustable individual blowers force water off the vehicle for more complete drying.

14) 15HP blowers can be substituted with 10HP blowers for more economical operation with only a slight decrease in performance.

Support

- 15) Quotation includes all hydraulic power packs, pumps, and air compressors necessary to operate the system.
- 16) H-25 Pump stations feature 15 HP electric motors and Wanner pumps each producing 20 GPM at up to 1000 psi.
- 17) 72-function car wash computer and motor switching center for precise control.
